# Chapter 1

## The Overview

The Tacit system consists of the following layers (listed here in no particular order):

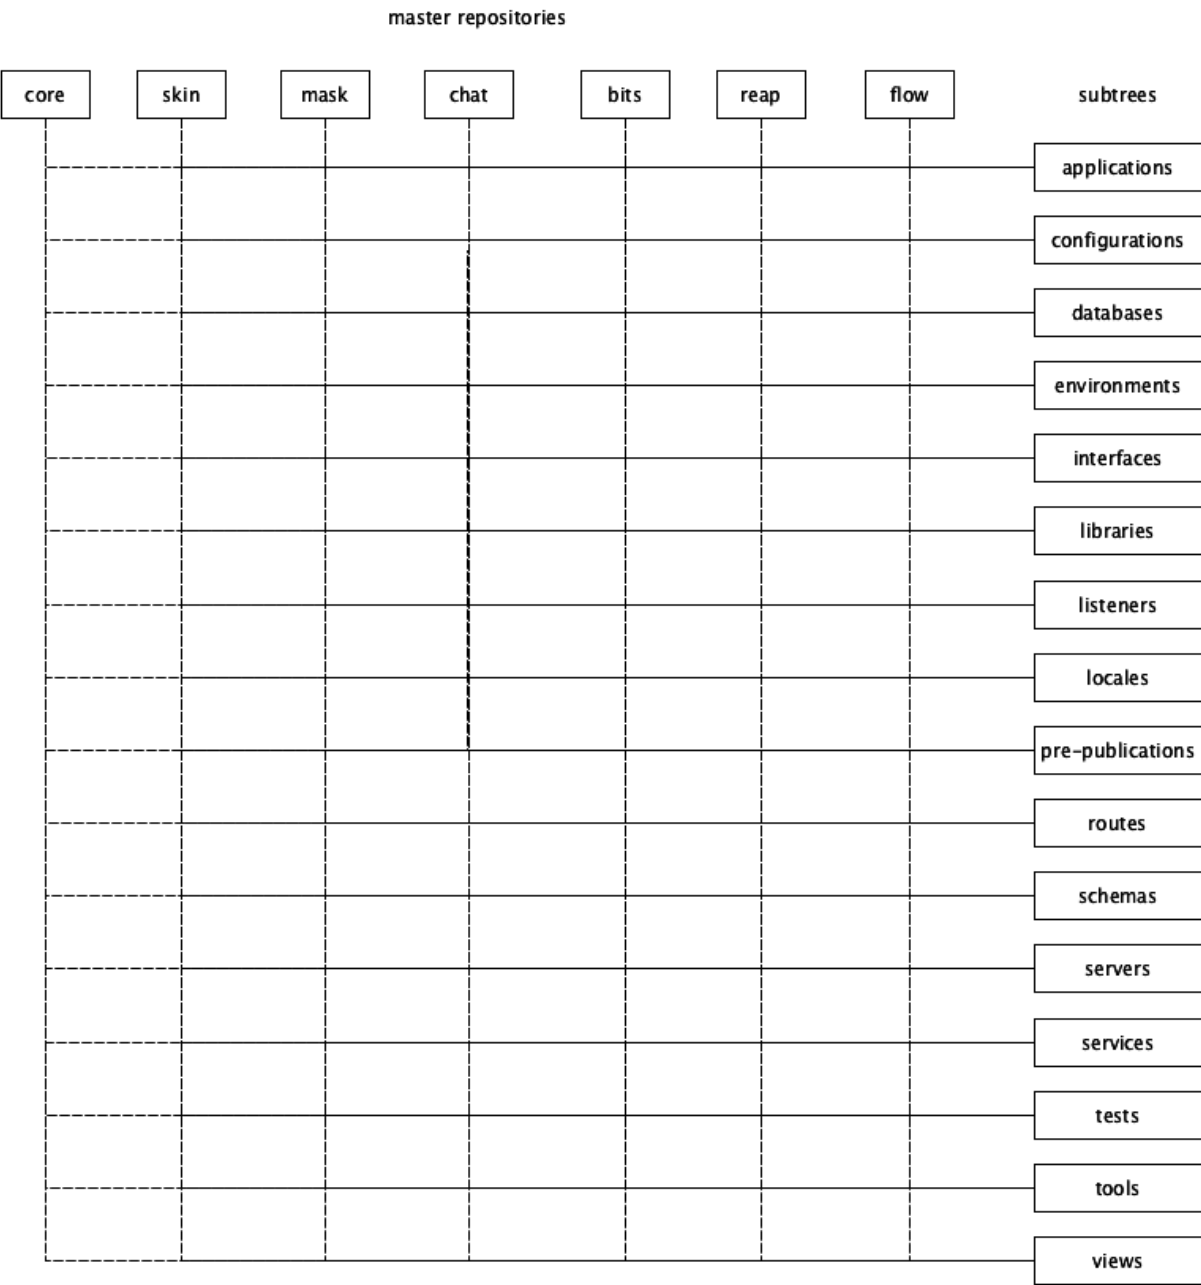

- core: business layer
- skin: layout layer
- mask: style layer
- chat: query layer
- bits: data layer
- kick: monitor layer
- reap: report layer
- flow: flow layer

Their relation to one another is depicted below:

### System Overview

On Github, the master repositories share centrally managed code kept as subtrees as follows:

Repository Hierarchy

# Chapter 2

It was a **bold** and *italic* night!

Suddenly, a shot rang out!

The cabin started to rumble...
