Contents

Chapter 1

The Overview
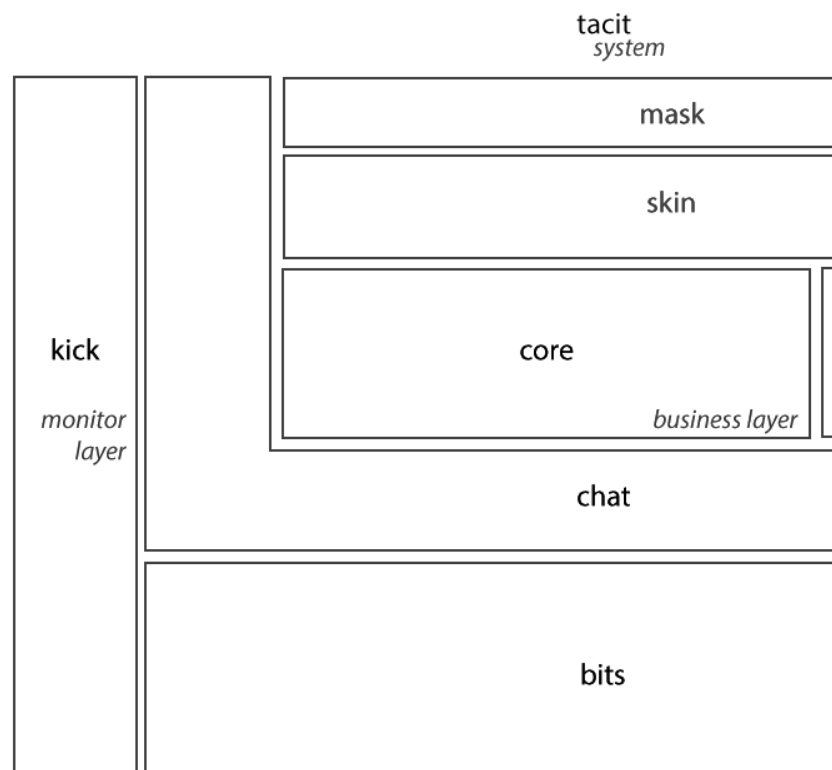

The Tacit system consists of the following modules (listed here in no particular order):

- core
- skin
- mask
- chat
- bits
- reap
- flow

tacit *system*

		mask
		skin
kick		core *business layer*
monitor layer		chat
		bits

Their relation to one another is depicted below:

On Github, the master repositories share centrally managed code kept as subtrees as follows:

master repositories

core	skin	mask	chat	bits	reap	flow	subtrees

- applications
- configurations
- databases
- environments
- interfaces
- libraries
- listeners
- locales
- pre-publications
- routes
- schemas
- servers
- services
- tests
- tools
- views

Chapter 2

It was a **bold** and *italic* night!

Suddenly, a shot rang out!

The cabin started to rumble…
